# Commitment to Quality

## A Heritage of Quality for 150 years

Gottfried Jetter

Aesculap, the world's largest manufacturer of surgical instruments, has been crafting high performance instruments in Tuttlingen, Germany since 1867. Named for the Greek god of healing, Asklepios, the company was founded by Gottfried Jetter, the first person ever to produce standardized surgical instruments.

Today, Aesculap employs nearly 12,000 people in our modern, Aesculap-owned and operated factories around the world, including 3,500 people in the Tuttlingen facilities which house over 450,000 square feet of production area.

Aesculap, the world's largest manufacturer of surgical instruments, has been crafting high performance instruments in Tuttlingen, Germany since 1867. Named for the Greek god of healing, Asklepios, the company was founded by Gottfried Jetter, the first person ever to produce standardized surgical instruments.

Today, Aesculap employs nearly 12,000 people in our modern, Aesculap-owned and operated factories around the world, including 3,500 people in the Tuttlingen facilities which house over 450,000 square feet of production area.

### PERFORMANCE QUALITY Surgical Instruments Made by Aesculap

For every surgical instrument *Made by Aesculap* we demand not just "Quality", but **PERFORMANCE QUALITY**. A surgical instrument with PERFORMANCE QUALITY is meticulously crafted to have a solid feel and to perform like an extension of the surgeon's own hand. To deliver PERFORMANCE QUALITY worthy of the Aesculap name, we start with the finest, raw materials including highly pure stainless steel which is purchased and tested in Tuttlingen. Our master craftsmen, who are among the most rigorously trained and experienced in the industry, then follow the strictest standards when crafting each instrument, including:

- **State-of-the-art German-made equipment** which is used in every Aesculap-owned factory worldwide
- **Aesculap hand-crafted, Gold-Plated Master QC Standards** that assure pattern consistency
- **Strict Aesculap manufacturing guidelines**, including tight tolerances more strict than International Quality Standards, for precision and reliability from first use and throughout the lifetime of each instrument

As our Mission states, we are "passionately committed to providing high quality, innovative products and services to all surgical disciplines."

### Aesculap product range:

- Surgical instruments for all disciplines
- Sterile containers
- Endoscopy
- Neuroendoscopy
- Aneurysm clips
- Power systems
- Pneumatic KAIRisons
- Spinal implants
- Orthopedics
- Per-procedure programs
- Repair services
- Consulting services
- Dura substitutes
- Hydrocephalus

# Aesculap U.S. Headquarters

## Aesculap U.S. Headquarters

Our U.S. Headquarters, located in Center Valley, Pennsylvania, was established in 1977 to serve the needs of the U.S. market.

Should you have any need or questions, our customer service professionals welcome your call.

Aesculap holds customers and patients to the highest level in our core values. Our commitment is to exceed your expectations.

## Please call customer service for:

- Placing orders

- Pricing

# History

## RIGID PACKAGING SYSTEMS: A CHRONOLOGY

**1890s** – Aesculap created the first rigid containers, originally made of stainless steel. In the early 1900s, while responding to the needs of military hospitals and aid stations, Aesculap manufactured chrome-plated containers for safe transport of sterile instruments.

Aesculap introduced reusable filters in the **1930s**, replacing valves and sliding vents. Rubber gaskets were added shortly thereafter, to ensure a proper seal between the lid and container bottom.

Since the **1960s**, Aesculap containers have been manufactured from a lightweight anodized aluminum, which provides optimal heat transfer properties. The lightweight construction also allows for easy handling and stacking.

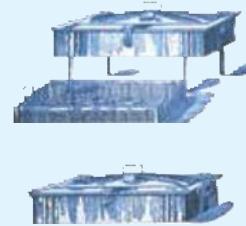

As technology has advanced, disposable, non-woven filters have replaced the textile filters.

At the Association of Operating Room Nurses (AORN) Congress in **1980**, Aesculap introduced the concept of Rigid Packaging for sterilization in the United States. Since that time Aesculap has consistently innovated and improved its products, introducing new generations of containers in 1984, 1988, 2000 and 2004.

2010 marked Aesculap's 30th anniversary of being the first vendor to introduce rigid sterilization container systems to the United States. Since 1980, Aesculap has grown to be the market leader by providing you unparalleled product quality and service.

Over 3,000 hospitals and surgery centers use the SterilContainer™ System today. Cost-effective quality and durability are the hallmarks of the SterilContainer System.

Being the first with the finest has kept Aesculap the undisputed quality leader in the rigid packaging industry.

## DESIGN FEATURES

### Case Design

- Superior construction of lightweight aluminum that weighs 15% to 20% less than other containers of similar size.

### Handle Design

- 90° stops to avoid pinching
- One-piece design for durability
- Centered, for even weight distribution

### Superior Latch Design

- Single-step open and close
- One-piece construction
- Centrally located for balance and control
- No protruding parts when placed into washer/decontaminator
- Audible click to announce proper latch closure

### Retention Plate & Silicone Gasket

- One-piece, one-step operation allows for quick filter change
- Audible “click” signifies proper closure
- Dual safety release buttons prevent accidental release
- Filter post and silicone gasket assure proper filter placement
- Complete seal between filter and lid

### Lid Design

- One-piece construction for easier maintenance and lower repair costs
- Lighter in weight for easy handling

### Container Bottom

- No protruding feet to catch on shelving
- Easily supports instrument loads
- Elevated area supports basket contents well above container bottom

# Sterilization Modality and Aesculap SterilContainer™ System

The SterilContainer System is a reusable rigid container system used for the packaging, transportation, and storage of instruments prior to, during, and after sterilization, **from Aesculap®, the world's leader in rigid sterile container systems.**

It consists of the SterilContainer™ (JK / JN Series) and SterilContainer™ S (JM Series) product families and is available in various sizes of bottoms and lids (containers), with assorted accessories such as baskets, filters (single use paper and polypropylene filters and reusable PTFE filters), indicator cards, tamper evident locks, filters, basket mats and instrument holders.

**JM489** Full-Size Lid

**JM789** Three-Quarter Size Lid

**JM389** Half-Size Lid

## SterilContainer™ S Mini-Size Container and Lid - Length 12¼ x width 5½

Small heat and moisture-sensitive instruments can be secured in the JM188/JM174 Mini-Size container for low temperature sterilization and storage.

**JM188**

**JM174**

2½-inch height

**JM174** (Shown) Lid  
**MD152** Lid with handle

## Extra-Long Mini Size Containers - Length 20 x width 5½

### Non-Anodized

**JM021**

3-inch height

Lid

**MD150**

Lid with handles

**Filter Requirements:** Two (4" x 9" filters)

\*All dimensions shown here are outside dimensions with the lid. For internal dimensions, please see pages 67-76.

# Instrument Organization System

# Instrument Organization System

## Organization and protection of surgical instruments

Aesculap's **Instrument Organization System** is an advanced system of organizing, storing and protecting your instrument set during transportation and sterilization.

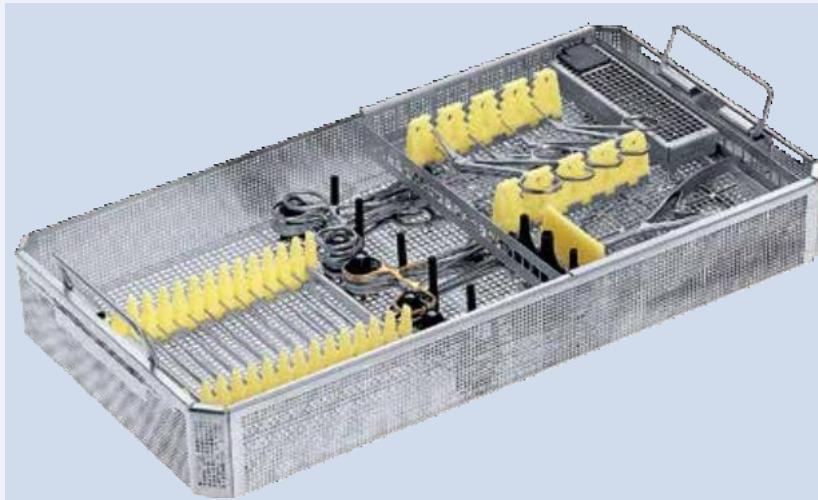

- Instruments organized with the **Instrument Organization System** are guarded against damage from instrument-on-instrument impact during transportation
- Instrument protection reduces the cost of repairs & set downtime
- Instrument protection increases instrument life & reduces replacement cost

In the O.R. a set organized with Aesculap's **Instrument Organization System** can also help cases flow more efficiently by allowing staff to:

- Quickly identify and select the correct instruments
- Work directly from the organized set
- Replace used instruments into the correct slot making final instrument count easier

During sterilization, Aesculap's **Instrument Organization System** allows:

- Better sterilant flow between instruments
- Consistent sterilization every time because your instruments are in the same place

## Silicone Instrument Racks (Mounting Type A)\*

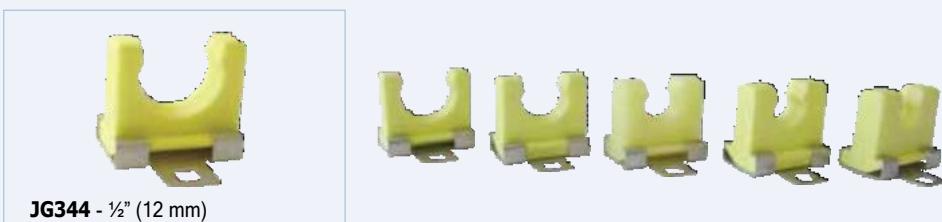

\*For all "Type A" mounting items, fixation pins and screwdriver are required, see page 32  
All items sold separately.

### Separating Racks (Mounting Type A)\*

### Small Silicone Holders (Mounting Type A)\*

### Metal Clamp with Silicone Inlay (Mounting Type A)\*

### Fixation Pins for Ring Handle Instruments

Comes with nuts and screws for mounting

JF346 - 1", height 1 1/8"

Mounting Type A - built in - does not require additional fixation pins

JF343 - 1/4", height 1 1/8"

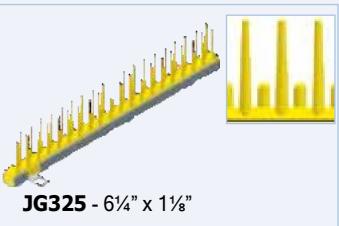

\*For all "Type A" mounting items, fixation pins and screwdriver are required, see page 32  
All items sold separately.

# Instrument Organization System

## Micro Instrument Organization System Instrument Racks

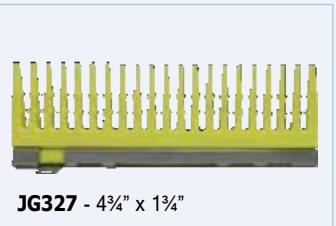

**JG320** - 4 $\frac{3}{4}$ " x  $\frac{7}{8}$ "

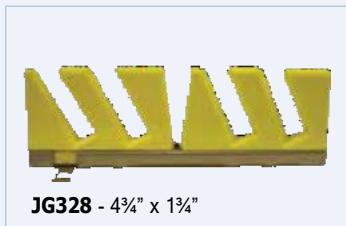

**JG325** - 6 $\frac{1}{4}$ " x 1 $\frac{1}{8}$ "

**JG326** - 9 $\frac{1}{2}$ " x 1 $\frac{1}{8}$ "

**JG327** - 4 $\frac{3}{4}$ " x 1 $\frac{3}{4}$ "

**JG328** - 4 $\frac{3}{4}$ " x 1 $\frac{3}{4}$ "

**JG333** - 2 $\frac{1}{4}$ " x 1 $\frac{3}{4}$ "

**JG329** - 4 $\frac{3}{4}$ " x 1 $\frac{3}{4}$ "

**JG334** - 2 $\frac{1}{4}$ " x 1 $\frac{3}{4}$ "

\*For all "Type A" mounting items, fixation pins and screwdriver are required, see page 32  
All items sold separately.

### Large Silicone Holders (Mounting Type B)\*

JG337 -  $\frac{1}{8}$ " (5 mm)  
JG336 -  $\frac{1}{4}$ " (7.5 mm)  
JG335 -  $\frac{3}{8}$ " (10 mm)

JG331 - 1" (20 mm)  
JG332 -  $1\frac{1}{8}$ " (30 mm)

Fixation clamp for Mounting Type B  
(JG330 - JG332)

**JG301R** 10 brackets

**JG301R** mounting brackets included

### Optics Holders (Mounting Type A)\*

Eyepiece holder

JG367

Sleeve holder

JG368

Support for angled optics

JG369

### Fixation Elements

Fixation pin for Mounting Type A  
Use JG302 Allen head screw driver to mount

JG300 10 pins/pack

Screwdriver with an Allen head for use with JG300, 3 mm head

JG302

10 nuts and 10 bolts/pack

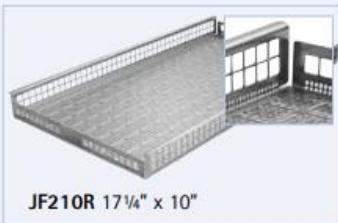

JG303R

GB459R

### Tray Insert and Silicone Inserts (Mounting Type C)\*

JF210R 17 $\frac{1}{4}$ " x 10"

To be used with tray inserts JF110F & JF210F

JG370 9 $\frac{1}{2}$ " x 1 $\frac{1}{8}$ "

To be used with tray inserts JF110F & JF210F

JG371 9 $\frac{1}{2}$ " x 1 $\frac{1}{8}$ "

To be used with tray inserts JF110F & JF210F

JG372 9 $\frac{1}{2}$ " x 1 $\frac{1}{8}$ "

JF110R 10" x 7 $\frac{3}{4}$ "

JF250R 12" x 10"

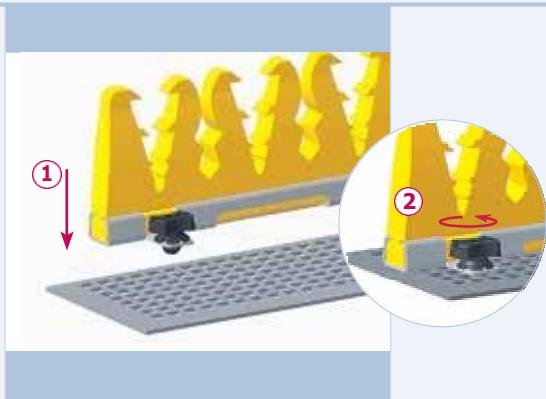

JF210R 17 $\frac{1}{4}$ " x 10"

\*For all "Type A" mounting items, fixation pins and screwdriver are required, see page 32  
All items sold separately.

# Instrument Organization System

## Mounting Type A

For instrument racks with fixation pin

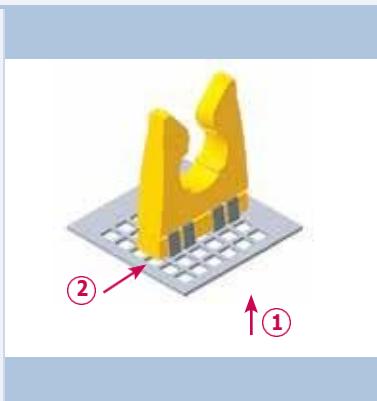

**Mounting Type A allows for easy top down assembly of the majority of SterilContainer™ Storage System silicone dividers**

- ① Insert fixation pin JG300 in the rack.  
Install rack with fixation pin in the tray.
- ② Push the fixation pin down, then turn it by 45° using JG302 - Allen screwdriver.

## Mounting Type B

For silicone holders with fixation clamps

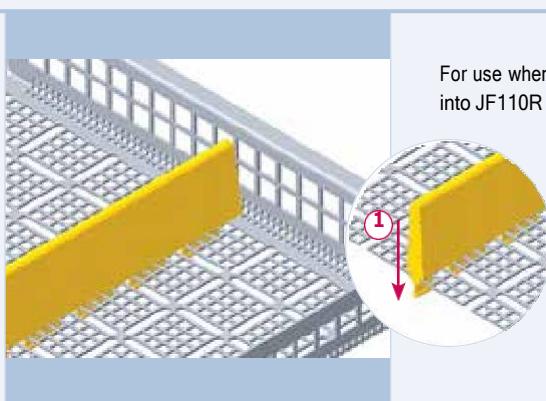

For use with  
JG330, JG331  
and JG332 only

- ① Press fixation clamp JG301R into tray from below.
- ② Slide in silicone holder sideways.

## Mounting Type C

For silicone racks in tray inserts

For use when inserting JG310  
into JF110R and JF210R

- ① Pull the silicone rack through the longitudinal slots in the tray.

\*Mounting Type C can only be used with JF110R and JF210R baskets

## Instrument Holders

ME150

**Full Size 14 Multi-keyhole Bracket**  
9 $\frac{1}{4}$ " x  $\frac{3}{8}$ " x 1 $\frac{1}{2}$ "  
236 x 9 x 38 mm

## Bar Code ID Brackets for Honeycomb Baskets

JG616U and JG617U are Bar Code Identification brackets that can be attached to HoneyComb or perforated baskets to aid in securing bar code labels to the basket. The stainless steel brackets are secured to the baskets by bending the flexible tabs into the perforations.

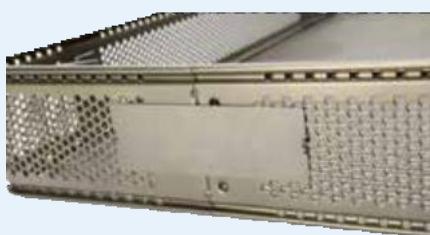

**JG616U**

**JG617U**

58 x 23 mm (2¼" x 7/8")

89 x 30 mm (3½" x 13/16")

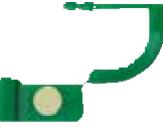

# Sterile Processing Products

# SterilContainer™ Processing Supplies

## Tamper Evident Locks

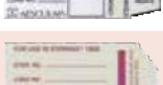

**Tamper Evident Locks** Seal containers for safety and security. Indicator dots change color when exposed to sterilizing conditions. Quantities of 1000 each.

	Item No.	Color	Description	Qty.	PreVac Steam	PreVac IUS	Gravity	EtO	Low Temp
	US900	Blue	No Indicator	1,000/pk	X	X	X	X	X
	US905	Green	Change <sup>1</sup> Yellow to Orange	1,000/pk				X	
	US906	Orange	Change <sup>1</sup> Blue to Brown	1,000/pk	X		X		
	US910	Pink	Change <sup>1</sup> Magenta to Blue	1,000/pk					X <sup>2</sup>
	US399	Yellow	Change <sup>1</sup> Blue to Brown	1,000/pk		X			

1. After sterilization, the external indicator should change from the original indicator color to the recommended post sterilization indicator color. The recommended post sterilization indicator color may not be evenly shaded but should be shades of the proper processed color to indicate exposure to sterulant.

2. Locks must be stored in a controlled room temperature, away from alkaline chemicals, acids and sources of light.

## Indicator Cards

	Item No.	Description	Qty.	PreVac Steam	PreVac IUS	Gravity	EtO	Low Temp
	MD345	Communication Card No Indicator	250/pk	X	X	X	X	
	MD346	Change <sup>1,2</sup> Brown in Steam Change <sup>1,2</sup> Orange in EtO	250/pk	X		X	X	
	MD399	Change <sup>1</sup> Brown in Steam	250/pk		X			
	MD876	Change <sup>1</sup> Brown in Steam for Quarter and Mini Size	250/pk	X		X	X	
	MD334	Change <sup>1</sup> Blue	250/pk					X
	MD335	Change <sup>1</sup> Blue for JM188 with JM174	250/pk					X

1. After sterilization, the external indicator should change from the original indicator color to the recommended post sterilization indicator color. The recommended post sterilization indicator color may not be evenly shaded but should be shades of the proper processed color to indicate exposure to sterulant.

2. Filter contains a dual indicator dot, which changes to brown in steam, and to orange in EtO.
